EXPERIENCE

React Developer — Nissi Software System

1 year

- Built responsive web interfaces with React and Tailwind.
- Collaborated with UI teams to deliver clean, modern layouts.
- Focused on performance, accessibility, and cross-browser consistency.

PROJECTS

Gutor — QHSE reporting platform for incident and audit workflows.
Built multi-step incident capture with guided validation for accuracy.
Covered HSE, Quality, Near Miss, and Accident categories in one flow.
Added dashboards and filters for status, history, and follow-ups.

Cabsat — Event landing page for a broadcast and media expo.
Designed sections for agenda, speakers, sponsors, and venue details.
Implemented clear CTAs for visitor passes and exhibitor bookings.
Optimized layout for fast navigation and mobile-first browsing.

SatExpo — Satellite and space ecosystem event site.
Organized highlights, exhibitors, visitors, and venue info in sections.
Crafted a clean visual flow so key details stand out quickly.
Integrated strong CTAs and consistent branding across devices.

Digi Auth — Authentication module with robust validation.
Delivered sign-in, sign-up, and password recovery flows.
Implemented clear error states and inline hints for usability.
Ensured accessible, responsive UI patterns across screens.

ORB — Admin dashboard for monitoring activity and users.
Built KPI cards and summary stats for quick scanning.
Organized navigation for users, reports, and activity reviews.
Optimized layout with spacing, color cues, and responsiveness.

IME — Event landing page with media-led storytelling.
Structured sections for exhibitors, visitors, media, and contact info.
Highlighted key stats with branded visuals and video integration.
Tuned typography and layout for readability and fast navigation.
