

ARUN BABU

React Developer

arunbabu1047@gmail.com | 8870064429 | Chandapura, Bangalore

PROFESSIONAL SUMMARY

React Developer with 1.3 years of experience building modern, responsive web interfaces using React.js. Skilled in developing dynamic UI, integrating REST APIs using Fetch, and managing state with React Hooks (useState, useEffect, useRef). Focused on clean UI, usability, and reliable frontend delivery with strong attention to detail. Experienced in building production-level applications, including dashboards, event platforms, and incident management systems, while optimizing code efficiency and enhancing user experiences. Proven ability to collaborate effectively across teams and deliver projects on time, maintaining high standards in project execution.

PROJECTS

Gutor

Incident Management System

- Developed a comprehensive QHSE reporting platform with multi-step incident workflows using React.js.
- Created dynamic audit forms with robust validation and conditional UI rendering to enhance user experience.
- Utilized useState and useEffect hooks for efficient state management, ensuring real-time updates.
- Implemented backend API integrations with Fetch API for seamless report submission and retrieval.
- Designed a responsive user interface leveraging modern CSS frameworks like Bootstrap.
- Supported various incident categories, including HSE, Quality, Near Miss, and Accident, with structured fields for consistent data entry.
- Incorporated loss capture, investigation inputs, and a risk/severity matrix for thorough assessment.
- Enabled tracking of status, history, and follow-up actions using dashboards and filters.

Ensured data accuracy and speed with guided forms, validation, and clear data grouping across sections.

CABSAT

Event Website

- Created a responsive event showcase website featuring agenda highlights, speaker grids, sponsor sections, and detailed venue information.
- Developed reusable components for efficient navigation, banners, and clearly defined sections, ensuring fast and intuitive user interaction.
- Optimized the website for performance, maintaining cross-device compatibility to provide a seamless experience on both desktop and mobile devices.
- Focused on structured layouts and user engagement through clear content hierarchy, quick call-to-action access, and a consistent brand presentation.
- Ensured that content remains sharp and visually appealing on smaller screens through the use of HTML, CSS, and JavaScript.

SATEXPO

Exhibition Platform

- Developed a promotional expo site featuring interactive landing pages with responsive design
 - Implemented UI components that align with consistent branding and event themes, incorporating animated highlights
 - Managed dynamic content rendering and layout structuring to maintain a strong visual hierarchy
 - Enhanced user experience by optimizing UI flow for readability, ensuring clear section breaks for long content
 - Created clear call-to-actions to guide users smoothly through event value and registration details with minimal friction
 - Designed the site to be lightweight and fast, prioritizing mobile-first browsing while maintaining a premium feel
- Utilized HTML, CSS, and JavaScript for building a visually engaging and easily navigable site

ORB

Admin Dashboard

Developed an interactive dashboard suite featuring KPI cards, trend panels, and quick-filter components. The design emphasized fast insight scanning, a clean data hierarchy, and responsive layouts to enhance readability and facilitate quick decision-making. I implemented a compact data block structure, prioritizing spacing, contrast, and alignment to ensure metrics remain understandable at a glance. The dashboard was built to scale efficiently from small setups to dense analytics pages. Utilized React and Tailwind for the front end and integrated API for seamless data handling. Additionally, developed an admin dashboard with a user reporting system, utilizing table-based UI with pagination and handling data effectively. Employed useEffect for API data fetching and lifecycle management, ensuring a clean and scalable component structure.

IME

- Developed a form-heavy workflow system with React and Tailwind, integrating frontend UI and backend APIs seamlessly.
- Managed application state using React Hooks to ensure a consistent and reliable user experience.
- Implemented a responsive and user-friendly interface, optimized for accessibility and performance, ensuring clarity in complex data entry.
- Designed dynamic sections, validations, and structured outputs to reduce rework and highlight required fields, maintaining visible progress.

Enhanced speed and error prevention to allow teams to complete long forms efficiently without friction.

EDUCATION

Bachelor of Computer Application

AVC College (Autonomous)

Final CGPA: 7

2018–2021

Master of Computer Application

AVC College of Engineering

Final CGPA: 7.0

2021 – 2023

SKILLS

- Frontend Development with HTML, CSS, and JavaScript
- React.js and Tailwind CSS Implementation
- Bootstrap and Material UI Utilization
- API Integration using Fetch API
- Responsive UI Development

ENVIRONMENT

- VS Code
- Git
- Postman
- Figma
- Chrome DevTools

Certifications

Java Full Stack - Greens Technology
